## Objective

---

I have a grounded knowledge and experience for building a functional, scalable and efficient web application that satisfies the need of the end-user with the core web development stacks.

## Skills

---

- Team collaboration
- Multitasking
- Software testing
- Code validation
- Quality assurance
- Interface design
- Critical thinking
- User support
- Communication

## Work Experience

---

**BlueTag Technologies.**  
Software developer

Sept 2020 - Present

- Created highly responsive and scalable web applications for use in different industries and client environments.
- Enhanced applications and improved performance using testing and validations against requirements and performance standards.
- Developed, designed, tested, and debugged applications from foundation to full production.
- Coordinated concepts, libraries, and style guides for development team.
- Helped manage fast-paced software delivery model from within complex development ecosystem.
- Tracked changes and seamlessly merged codes from different features and updates to manage versions.
- Met application goals with expert use of optimal development tools and frameworks.
- Enhanced Web sites and applications by developing robust databases.

## Stack

---

JavaScript[ES6], Express, ReactJS, NodeJS, Firebase, MySQL, MongoDB, HTML/CSS/SASS, Bootstrap, C#.

## Volunteer

---

**Wordpress Developer**  
IMT, UNTH, ESCET, KOGI

Nov 2021

- Enhanced websites and improved performance against requirements and performance standards.
- Attracted users to websites with professional, user-friendly designs for high-performance operation.
